

KNOWBE4 PHISHING ASSESSMENT TOOL

Go Beyond the Firewall

In this day and age, it's easy to think that your vulnerabilities are more technology-based, but hackers know the truth: it is much easier to convince a human to break the security rules they are asked to follow than it is a programmed firewall. Therefore, it's critical for organizations of all sizes to train their employees as the first line of defense against a cyber-attack.

SBS CyberSecurity has partnered with KnowBe4, the world's most popular integrated Security Awareness Training and Simulated Phishing platform, to provide a better way to manage the urgent security problems of social engineering, spear phishing and ransomware attacks.

The Solution

- Keep employees on their toes and security top of mind with access to unlimited on-demand security awareness training.
- Test your employees with easy-to-use phishing templates, plus:
 - Unlimited Phishing Security Tests
 - Industry Benchmarking
 - Phish Alert Button
 - Monthly Email Exposure Check
 - Vishing Security Test
 - EZXploit™ - Automated Human Pentesting
 - USB Drive Test™
 - Vulnerable Browser Plugin Detection
- Quickly educate your employees with point-of-failure training.
- See the results with management-ready reports.
- Get access to all training modules.
- Access SBS Help Desk Training and Support.

Why Choose KnowBe4?

Train Your Team

Get access to the world's largest library of security awareness training content; including interactive modules, videos, games, posters and newsletters, plus automated training campaigns with scheduled reminder emails.

Test Your Team

Frequently send highly effective, random phishing tests to identify the percentage of your end-users that are phish-prone. Several remedial options are available for employees who fall for a simulated phishing attack.

Get Results

Truly show your ROI with enterprise-strength, management-ready reporting, showing stats and graphs for both training and phishing.
